

Telephone Hood Rotterdam

Side parts made of acryl glass, lighting and place of deposit of varnished steel plate. A model, which is sleekly and practically integrated in the room. The model Rotterdam is especially suitable for later adjustment as it contains no backboard and the telephone is fixed directly on the wall.

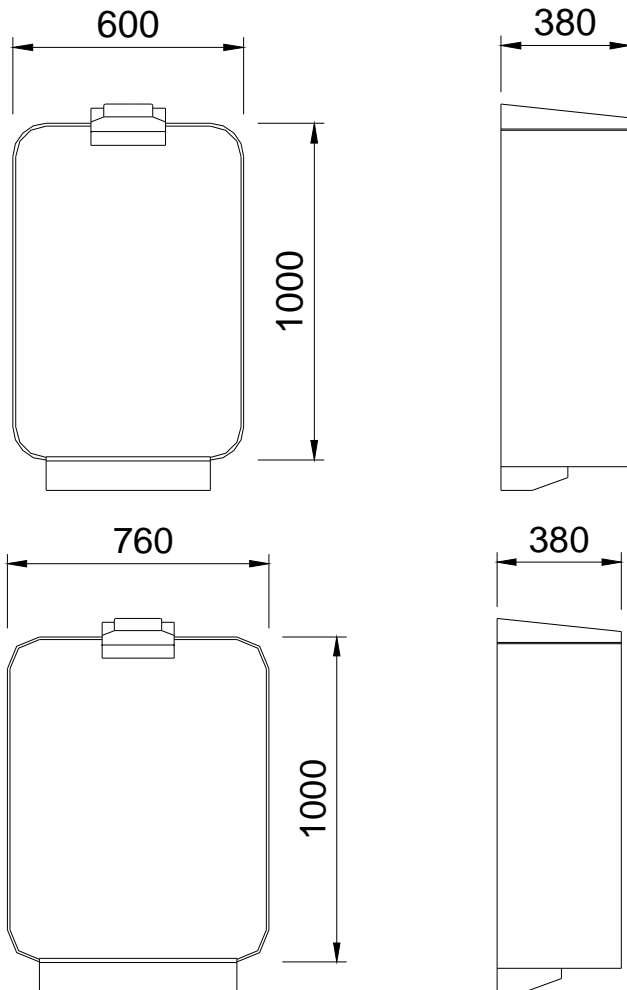

Our telephone hoods are designed for installation in inside rooms. They are suitable both for coin and for card-payphones. When ordering please state the type of telephone.

- 1.) Practically suitable for all customary types of coin payphones and card payphones as no mounting plate is necessary.
- 2.) If the telephone is already installed on the wall installation of the telephone hood is still possible.

Execution

Place of deposit for books and illumination carrier made of steel, basalt grey varnished and integrated illumination carrier with fluorescent tubes 2 x 11 W. RAL- and special colours on demand. Rotterdam can be delivered in two width (600mm and 760 mm).

Installment information including a technical drawing of the arrangement of the holes to be drilled in the wall is included in the delivery. These are subject to change.
